

Productive Conflict

Positive Behavior Management Model

The purpose of this model is to help students in their efforts to grow up. The process of growing up is often confusing and challenging for many students. Some students are not sure if they are growing up or down. There are different developmental stressors and pressures that students experience, not to mention emotional hardship due to various environmental risk factors. This evidence based model provides a framework for staff to create a positive learning environment for students to grow up both academically and emotionally / behaviorally. Emphasis is placed on a proactive and responsive approach that reinforces responsible decision-making and positive behavior. It is designed for students in elementary through high school.
